**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite temperatures not especially high for late May, it will feel very warm on Saturday afternoon given the light winds and strong sunshine. High or very high UV levels can damage your skin, so remember your sun protection and hat and stay hydrated by taking plenty of water.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Sunday 28 May 2023

Weather: Another fine day is expected however skies are likely to be cloudier compared to today. This cloud will however remain above all summits, so it will still be bright. Not feeling quite as warm due to slightly breezier conditions compared to Saturday.

Maximum wind: North-easterly 15-20 mph with isolated gusts of 25-30 mph.

Chance of cloud-free hill tops 600m: Greater than 95%.

Low cloud and visibility: Cloud is expected to remain above all summits. Very good visibility with excellent air clarity developing allowing distant hills and landmarks to be clearly visible.

Temperature: **Valleys:** Plus 5 Celsius rising to plus 20 Celsius.
At 600m: Plus 9 Celsius rising to plus 16 Celsius.
Freezing level: Well above the summits.
